## Business Calls for Political Stability

The Malta Chamber of Commerce, Enterprise and Industry has followed with utmost concern the recent developments taking place in the current political scenario.

The country's political leaders know where the Chamber stands on issues of national interest because it has never shied away from expressing its views. As a responsible organization, the Chamber believes that business cannot thrive without economic and political stability.

In the interest of continued economic prosperity, therefore, the Chamber urges all political parties to exercise caution and maturity to ensure Malta's reputation as a respectable global centre for business is safeguarded.
