

THE MALTA CHAMBER

PRESS RELEASE

8th June 2021

The Malta Chamber and PT Matic strengthen ties

The Malta Chamber of Commerce, Enterprise and Industry has renewed its Bronze Collaboration Agreement with PT Matic Environmental Services Ltd. For the second consecutive year, PT Matic will be paired with The Malta Chamber's 'Circular Economy Committee' to provide leadership support to business on matters related to sustainability and resource management.

Ahead of the signing, Ms Marisa Xuereb, President of The Malta Chamber, noted that the continuation of this partnership reflects the essential work that has been carried out between both parties in the last year in exploring possibilities and future global economic scenarios with a view to forecast and advise on required strategies and resources.

"The role and work of the Malta Chamber centres around mobilising people and resources with a view to promoting a business environment which is conducive to the prosperity and wellbeing of its members and the Maltese people whilst advancing the islands as a worthy jurisdiction for trade, services and investment within the Mediterranean region, the European Union and the rest of the world," noted The Chamber President.

Ing. Oliver Fenech, General Manager of PT Matic Environmental Services Ltd, said "it is with great pleasure that we renew our sponsorship with The Malta Chamber. We are pleased to have found in The Chamber, but also in the Circular Economy Committee therein, the right level of commitment and professionalism necessary to drive the transition towards a Circular Economy. Over the next year we thus look forward to continued efforts in submitting the right policy proposals and in leading initiatives that enable private enterprise to occupy a driving role in achieving circularity."

The Circular Economy Committee is a horizontal policy committee set up to draw on the work of experts and Economic Groups to ensure that The Malta Chamber is centrally positioned to provide leadership in the country and to the business community on issues of environmental sustainability with the aim to help businesses reach their ambitions and objectives. The work carried out by this Committee has been greatly impactful especially during the pandemic.

The Bronze Collaboration Agreement was signed by Ms Marisa Xuereb and Mr Christopher Vassallo Cesareo as President and Deputy President of The

Malta Chamber respectively, and Ing. Oliver Fenech as General Manager of PT Matic Environmental Services Ltd.
