

**2024 Pre-Budget Document Proposals by
The Malta Chamber of Commerce, Enterprise and Industry on:**

HEALTHCARE

1. A framework focusing on a **proper reimbursement model** and **early access to innovative medicines** is required.
2. The **period of supply specified in medicine supply tenders needs to be shortened**, due to the fact that the pharmaceutical industry is currently facing several challenges which are entirely outside of its control. Going for shorter time frames will ensure better availability and more realistic market prices.
